DHARMIK M SHETH

Technical SEO & AI Automation Specialist

Ahmedabad, Gujarat, India · +91 77790 55445
shethdharmik3@gmail.com · linkedin.com/in/dharmik-sheth

PROFESSIONAL SUMMARY

In-house technical SEO and digital marketing specialist with over 18 months of experience growing organic visibility for two sister engineering-outsourcing firms in mechanical design and BIM/CAD. Own technical SEO, content, and link acquisition end to end — running guest-post outreach and link-building campaigns, producing case studies, guides, and checklists, and building custom Python tooling that removes repetitive manual work from audits. Experienced in keyword and competitor research, WordPress management, and performance reporting via Google Analytics 4 and Search Console.

PROFESSIONAL EXPERIENCE

Tesla Outsourcing Services

March 2025 – Present

SEO Executive (In-House) | Ahmedabad, India

- Own technical SEO in-house across both sister-company websites — teslamechanicaldesigns.com (primary) and teslaoutsourcingservices.com — running audits and resolving crawlability, indexation, metadata, and site-structure issues.
- Plan and execute link-building and guest-posting campaigns end to end — prospecting relevant industry sites, handling outreach and editor negotiation, and placing published articles to build domain authority and referral traffic.
- Conduct keyword and competitor research to shape content strategy and target ranking opportunities.
- Produce marketing and SEO content for both sites — case studies, guides, checklists, blogs, articles, landing pages, and website copy covering mechanical design, FEA/CFD, sheet metal, and reverse engineering.
- Built and maintain a suite of ten custom Python SEO tools — meta tag scraper and optimizer, image URL extractor and scraper, alt tag checker, internal link analyzer, and AI generators for titles, meta descriptions, blogs, and articles — cutting on-page analysis and data scraping from one to two days down to a single day per site, roughly halving audit turnaround.
- Manage both WordPress sites end to end, including metadata, on-page content, and technical fixes.
- Report on organic performance for both properties using Google Analytics 4 and Google Search Console.
- Design AI-assisted research and content workflows across ChatGPT, Claude, and Gemini, and produce marketing video assets using Google Flow.

Medvac Infotech

August 2024 – March 2025

Research Assistant & Digital Marketing Intern | Ahmedabad, India

- Conducted market, competitor, and pharma software research to support business strategy decisions.
- Supported SEO, social media marketing, and content initiatives across company channels.
- Developed an AI chatbot with API integration to handle digital engagement and internal research queries.
- Designed marketing assets in Canva and ran website research to support live campaigns.

PROJECTS

- **SEO Automation Toolkit** — Suite of Python tools for metadata analysis, image extraction, internal link auditing, and AI-assisted content generation. Used daily in live client SEO delivery.
- **AI Chatbot** — AI chatbot built on API integration with a knowledge-base architecture, deployed to improve website engagement.
- **n8n Workflow Automation** — Automated workflows connecting content generation, review, and blog publishing to remove manual handoffs.
- **Content Asset Library** — Case studies, guides, checklists, and downloadable resources created to support organic acquisition and guest-post placement.
